

Camp Florida Drone Operation Guidelines

- **All recreational flyers must pass a safety test and provide proof of passage. The Recreational UAS Safety Test (TRUST) was developed to meet this requirement.**
 - You may take the free online test through any of the FAA approved test administrators.
 - All FAA-approved TRUST test administrators offer the test free.
 - All test questions are correctable to 100% prior to issuing your completion certificate.
 - After completing TRUST, you will need to download, save, or print your completion certificate.
 - If you lose your certificate, you will be required to re-take TRUST.
- **First-Time Pilots must:**
 - Operators must be 16 years old.
 - Operators must be able to read, speak, write, and understand English.
 - Operator must be in physical and mental condition to safely fly a drone.
 - Pass the initial aeronautical knowledge exam: “Unmanned Aircraft General-Small (UAG)”
 - You must have your Pilot certificate available at all times while flying your UAS.
- **Requirements for Remote Pilot Certificate:**
 - Must be easily accessible by the remote pilot during all UAS operations
 - Certificate holders must complete an online recurrent training every 24 calendar months to maintain aeronautical knowledge recency.
- **If your drone weighs more than .55 lbs., you must register your drone through the FAA’s Drone Zone.**
- **Drones are to be flown for Recreational purposes only.**
- **You must keep your drone within the visual line of sight at all times.**
- **Drones must be flown above roof top levels to protect property owners’ personal privacy.**
- **Drones cannot be flown above 400 feet, which is considered restricted airspace.**
- **Drones cannot be flown within 1000 feet of the eagle’s nest during nesting season which runs from October 1st until May 15th. This would prohibit flying a drone over the pool area, storage area, club house building, etc. which are all within the 1000 feet eagle restrictions.**
